Lighting 101: Selecting the Right Lightbulb for Your Space

Kelvin = The Color of Your Light

Lumens = The Brightness of Your Light

Choosing Your Lumens

230-270 lumens

Accent & atmosphere. Any spot where you want warmth and mood over visibility.

440-480 lumens

Ambient layering. Sconces, decorative pendants, and secondary lamps.

650-850 lumens

The everyday workhorse. Reliable, functional light. Kitchens, bathrooms, entryways.

1,000+ lumens

Task, utility, necessity. Under-cabinet lighting, reading lamp, home office, garage.
